Applicant Analysis / First-Year Enrollment Dental Laboratory Technology

1981/82

SUPPLEMENT 5
TO THE
ANNUAL REPORT 1981/82
DENTAL AUXILIARY EDUCATION

This report, Applicant Analysis/First-Year Enrollment--Dental Laboratory Technology, 1981-82, contains information gathered in The Annual Survey of Dental Auxiliary Education Programs, 1981-82. The information reported here is divided as follows:

Table 1	Admission policies
Table 2	Applicant and first-year enrollment data
Table 3	Criteria used in admission process
Table 4	Programs that accept out-of-state or out-of-district students
Table 5	Programs with provisions for advanced placement
Table 6	Level of education of students entering first year

In 1981-82, 33 students were admitted without minimum requirements to dental laboratory technology programs (Table 1).

The number of applications made by women to dental laboratory technology programs was 1,150, while 1,409 applications were made by men. Eighty-four percent of the applications made by women met the minimum requirements for admissions, and interestingly enough 84% of the men's application met the minimum requirements for admission also. Since not all schools reported this information about their admission applications, these percentages are based on only those programs which provided such information.

Fifty-six programs reported accepting a total of 518 out-of-state students, and 29 programs in community colleges reported that they accepted a total of 102 out-of-district students (Table 4).

Forty-seven programs reported provisions for advanced placement. The number of students admitted with advanced placement for 1981-82 was 52 (Table 5).

The level of education of the first-year class of the dental laboratory technology programs is as follows: 68.7% of the students had earned a high school diploma or equivalent; 20.9% had completed 1 or 2 years of college; 1.5% had earned an associate degree; 4.7% had completed 3 or 4 years of college; while 3.5% had earned a baccalaureate degree. Only 0.6% had completed other levels of education. These percentages are based on those programs reporting such data (Table 6).
